A nurse navigator provides support and education to patients and their families from the time of diagnosis and throughout treatment. We are here to advocate for our patients, and assist with the coordination of their care while encompassing the core values of Providence Little Company of Mary. We collaborate with the entire medical team and act as a liaison among health professionals and community agencies to ensure that our patients receive the best care possible.

We strive to empower our patients and provide them with the resources needed to help them make informed decisions while providing compassionate care.
