

Women’s Imaging Center

Imaging and Breast Center

Dear Patient,

We would like to offer you a basic cancer risk assessment today, by completing this simple questionnaire. Identification of risk factors may help your doctors to create the best program for cancer prevention and early detection.

If you answer YES to any question below, you may benefit from an appointment with our Genetic Counselor.

Cancer Family History

Circle **Y** for those that apply to YOU and/or YOUR FAMILY

*Consider all male and female relatives on both mother’s and father’s side including: children, parents, grandparents, great-grandparents, brothers/sisters, aunts/uncles, nieces/nephews, and first cousins

		CANCER	SELF/ SIBLING AGE AT DIAGNOSIS	RELATIVES ON MOTHER’S SIDE	RELATIVES ON FATHER’S SIDE
		<i>EXAMPLE:</i>	Me 35 Sister 40	Aunt 35	Grandmother 75
Y	N	Do you have Ashkenazi Jewish ancestry? If no, go to next question. If yes, do you have an Ashkenazi Jewish family member with breast, ovarian, or pancreatic cancer diagnosed at any age?			
Y	N	Ovarian cancer at any age?			
Y	N	Male breast cancer at any age?			
Y	N	Breast cancer at 45 years of age or younger?			
Y	N	Colon or uterine cancer at 50 years of age or younger?			
Y	N	Two breast cancer diagnoses in a SINGLE person, with one diagnosed at 50 years of age or younger?			
Y	N	Two breast cancers on the same side of the family with one diagnosed at 50 years of age or younger?			
Y	N	Three or more breast cancers on the same side of your family diagnosed at any age?			
Y	N	Combination of three or more of the following cancers on the same side of the family diagnosed at any age? Pancreatic, prostate, breast, ovarian, colon or uterine
